

24-7

RESPONSE

Classification, Labelling & Packaging of Substances and Mixtures (CLP)

Compliance made easy

Are you a manufacturer or importer of pure substances or mixtures?

- * Are you aware of the new CLP Regulations that came into force on 01 December 2010?
- * Do you know how it will affect you and downstream users of your products?
- * Do you understand how to comply with the new regulations?

If not 24-7 response is here to help

Drawing on our experience in chemical transport and supply legislation we have designed a course aimed at providing delegates with an insight into CLP, and the reasoning behind it and most importantly how to comply.

24-7 response is part of the OAMPS Group; our team of consultants specialise in chemical transport and supply legislation, including REACH, GHS/CLP (Classification, Labelling and Packaging). We can save you time and provide a cost-effective means of meeting your regulatory obligations.

Safe Hands in
a Crisis

Compliance Made Easy

CLP is the legislation which enforces the Global Harmonisation System (GHS) in the EU and replaces the Dangerous Substances Directive (DSD) and Dangerous Preparation Directive (DPD). CLP came into force on the 1st December 2010 and requires re-classification of many substances and mixtures. CLP is not the same as GHS as GHS is based on a building block approach and a regulatory model rather than legislation.

Therefore, each country implement under their own legislation selecting the elements they find most relevant and adding their own elements if required. The EU has produced the CLP legislation on behalf of all Member States and it is currently in force for pure substances only - mixtures (formally known as preparations) will need to comply with the legislation by June 2015.

CLP incorporates REACH therefore it will be the classification and labelling protocol under REACH.

CLP will affect everyone who uses chemicals; the government are not providing any official guidance on the legislation.

Therefore the responsibility to educate the general public falls on the manufacturers, importers and distributors of chemical products. Are you prepared for this?

Delegate Profile

Staff involved in the classification, labelling and authoring of Safety Data Sheets.

Course Content

- * Background of GHS and CLP
- * CLP versus DPD/DSD
- * The requirements of CLP legislation explained
- * Help with understanding the classification system and calculation methods
- * The dates when you need to comply by

Course Duration

One day course commencing at 9.00am.

Location

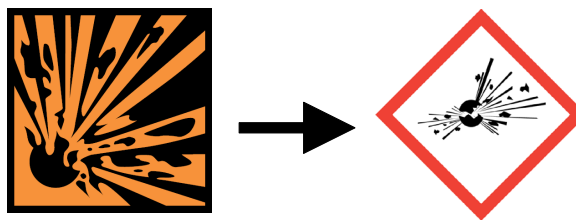

In house or at one of our 3 Training facilities

Benefits

Following CLP training delegates will be fully aware of the requirements of CLP and the actions required to comply with the legislation.

Fees

Course fees on request.

We may also be able to assist you further with our additional services:

Incident Response – Level 1, 2 & 3 response, the complete solution

24/7 emergency advice over the telephone is known as Level 1 response. For clients of OAMPS Petrochemical insurance we can also provide Level 2 (Advice at the scene) and, through our nationwide network of UK Spill accredited contractors, a Level 3 (Clean-up) response.

SDS Authoring

Every product that is classified as hazardous for supply must have a REACH-compliant Safety Data Sheet (SDS). The 24-7 Response team can generate new SDS and have them translated into many languages.

DGSA

There is a legal requirement under ADR for anyone involved in the loading, unloading or transportation of dangerous goods to appoint a Dangerous Safety Goods Advisor (DGSA). 24-7 Response has a team of consultant DGSA's who can act as your DGSA. Our Principal Consultant is a founder member of the The British Association of Dangerous Goods Professionals.

Staff Training

Drawing on the expertise of the 24-7 Response advisors, we have designed Chemical Hazard Awareness and Spill Response Courses that will give your staff an understanding of the risks of handling hazardous products - and what to do should things go wrong.

Through our sister organisation, PTF, we also deliver SQA accredited DGSA training courses.
